Who We Are

HRTM is a team of professionals specializing in the delivery of Human Capital Management software solutions. We pride ourselves on the dedication and skill of our staff who are committed to helping our clients succeed. As a smaller company we are easy to work with, nimble, flexible and driven to help our customers achieve their goals. With expertise in the Public Sector/Public Safety industries, we are focused on services and product extensions for Workforce TeleStaff, Workforce Central and UKG Pro WFM (formerly known as Dimensions).

With years of industry experience, HRTM consultants combine business and UKG application knowledge to deliver sustainable Workforce Management solutions to our clients. Our consultants and management team have deep experience in the Public Sector and Healthcare markets including University, K-12, and city and state government.

Our Team

A TeleStaff team comprised certified TeleStaff Solution Consultants with over 50 years of combined product experience. Most resources are active or former first responders who understand the operational requirements of Law Enforcement, Fire/Rescue/EMS and other municipal agencies. This industry experience instills confidence in our team from our clients and allows us to produce the best solutions to fully leverage the power of Workforce TeleStaff.

A team of UKG WFC and UKG Pro WFM technical resources with an average of over 20 year's experience leading new implementations, optimizations, upgrades and integrations for Public Sector, Healthcare and Manufacturing clients.

Our Products

Extra Duty Administration (EDA) - a software service for TeleStaff users. EDA streamlines the invoicing process for public safety agencies who commonly provide contracted extra duty services to its customers. EDA complements the power of TeleStaff ensuring timely invoicing and collection monitoring for extra duty service providers.

Data Exchange System- a third-party interface that is designed to transfer crucial employee data, including demographics and leave balances, from your HR system to TeleStaff with ease.

TeleStaff Backup System- can be used as an interim tool to minimize manual functions and a solution to extract backup TeleStaff data on a pay period cycle.
