Quokka

SOLUTION SHEET

Quokka's Contextual Mobile Security Intelligence

Your mobile security is only as strong as the risk intelligence driving it.

Hidden threats, privacy risks, and vulnerabilities are everywhere—leaving your organization exposed to attacks you can't see coming. Most tools stop short at app risk intelligence, flooding you with irrelevant data and false positives, making it hard to act.

Quokka's Contextual Mobile Security Intelligence is app threat intelligence that uncovers what others miss—malicious behaviors, colluding apps, privacy risks, and compliance gaps. Powered by detection engines and machine learning, it cuts through the noise to deliver precise, actionable insights within your own infrastructure or dedicated systems.

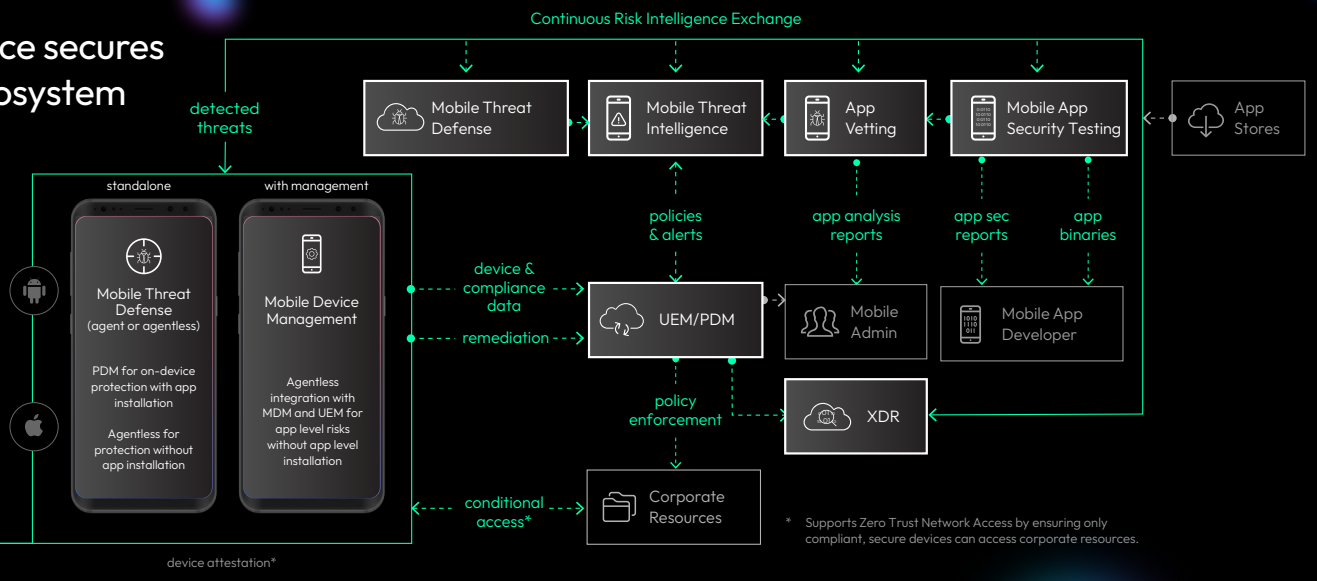

Quokka changes that.

Proven results, unmatched expertise

10M+	devices protected	230+	mobile CVEs
2M+	apps scanned	350+	academic citations
115K+	weaknesses found	75+	customer countries
500+	device vulnerabilities	11	academic papers

App intelligence secures the mobile ecosystem

Quokka transforms intelligence into solutions that deliver actionable insights

Quokka's Contextual Mobile Security Intelligence powers Q-scout and Q-mast, delivering comprehensive solutions to secure your mobile ecosystem.

Qscout

Designed for device security, Q-scout uses behavior-driven detection to uncover threats that put your organization at risk. It provides in-depth risk assessments, streamlines app vetting, and enables swift action to secure mobile devices—no matter the OS.

Qmast

Designed for app development, Q-mast embeds security directly into your workflow to prevent users from being exposed to risks posed by insecure apps. From code to supply chain, it performs comprehensive testing to pinpoint vulnerabilities early and ensure secure app releases from the start.

The Quokka Difference

Cut Costs, Simplify Security
Replace fragmented tools with one solution that delivers precise, actionable insights.

Act Faster
Prioritize real risks, eliminate false positives, and respond to threats with confidence.

Stay Compliant, Build Trust
Address risks proactively to meet security standards and protect sensitive data.

Future-Proof Your Security
Detect evolving threats with intelligence that scales with your needs.

Secure Apps Faster
Fix vulnerabilities early and deliver high-quality apps with confidence.

Why choose Quokka?

Setting Standards
From mobile security standards with **NIST** to leading the industry with 230+ CVEs to academic papers cited 350+ times.

Real-World Context
Analyze apps and devices in real environments for unmatched visibility into emerging risks.

Privacy-First Approach
Ensure security and compliance without compromising personal data.

Trusted by Organizations with the Highest Security Standards
