Raise

Stop Reacting to Funding Opportunities.

Start owning them.

$150B+	20,000+	80%	3-5x	Days
Non-dilutive funding annually	Opportunities tracked	Less time searching	More opps found	Not weeks to draft

The Problem

> *Most teams aren't losing funding because their work isn't ready. They're losing it because they found out too late, submitted without positioning, or never knew the opportunity existed.*

The U.S. government deploys more than **$150 billion in non-dilutive funding every year** — grants, SBIRs, OTAs, and tax credits that don't require giving up equity.

The organizations that consistently win are already in the room before solicitations drop. They know the landscape. They position early. Most teams don't — and they pay for it.

- **Scattered databases** no single source of truth
- **No fit scoring** can't tell which opps are worth pursuing
- **Zero historical intel** no visibility into who wins, how, or why
- **Proposals from scratch** weeks of work to maybe get nowhere
- **Reactive posture** most teams find out after the window closes

Who It's For

Founders & Startups

Early to growth-stage companies in defense, manufacturing, climate, AI, and deep tech pursuing non-dilutive capital to extend runway — without giving up equity.

Research Teams

University spinouts, national lab teams, and R&D organizations with fundable work who need to find the right programs and build winning applications.

Innovation Leads

Enterprise teams pursuing grants, OTAs, and federal programs to fund applied R&D and strategic initiatives without the overhead of a full grants team.

Grant Consultants

Advisors and firms who serve multiple clients and need scalable discovery, intelligence, and proposal tools across their full portfolio.

What Raise Does

Raise is the end-to-end funding intelligence platform for organizations pursuing non-dilutive capital. AI-powered discovery, five years of historical funding intelligence, and proposal automation — in one workspace. Your team spends time winning, not searching.

Discovery

20,000+ federal, state, and private opportunities matched to your profile automatically.

Intelligence

5+ years of agency patterns and past winner data so you position before the RFP drops.

Proposals

AI-guided first drafts in 24 hours. Go from weeks to days on every submission.

Strategy

Build a diversified funding roadmap instead of chasing individual opportunities.

How It Works

01	**Profile your organization**	Raise builds a funding profile from your stage, sector, mission, and goals — the foundation for everything that follows.
02	**Discover matched opportunities**	AI scans 20,000+ sources and surfaces opportunities ranked by fit and probability of win.
03	**Prioritize with intelligence**	Historical agency data shows who wins and how to position before you write a word.
04	**Draft and submit faster**	AI-guided proposal builder delivers a first draft in 24 hours. Your team refines, not restarts.
05	**Build your funding roadmap**	Raise maps your pipeline across multiple cycles so you're never reacting to single opportunities again.

Why Not Just Use What You Have?

Current approach	Why Raise
Manual databases (SAM.gov, Grants.gov)	20,000+ sources in one place. AI fit scoring. No more hunting across fragmented systems.
GovSignals & enterprise intelligence platforms	Enterprise pricing built for primes, not small businesses. We are a small business — and we built this for you. Their transaction ends when you get funded. Ours is just beginning.
ChatGPT / AI writing tools	Grant-specific intelligence, compliance-ready output, and discovery built in. Generic AI doesn't know your agency or your program.
Grant management software	Built for seekers, not grantmakers. Discovery and proposals in one place, not two subscriptions.
Status quo / doing nothing	Stop missing 95% of opportunities. Reclaim 15+ hrs/week. The first grant Raise helps you win pays for years of the subscription.

"We won a grant we had never heard of. The AI matched us, the intel showed us how to position, and the draft was ready in a day."

— University spinout, advanced manufacturing

The funding is out there.

Raise shows you where to look — and how to win.
